

## Notched Guttering

A true product innovation

### The revolutionary new Polypipe Notched Gutter is a true innovation within rainwater systems.

Included in our new Elegance Ogee profile system, Notched Gutter provides a secure fit and counteracts the problem of gutters becoming dislodged from their retaining clips during warm weather due to heat expansion.

With the new Polypipe Notched Gutter, dislodgement due to heat expansion and the resulting leaky joints, is a thing of the past. The leading edge of the gutter is notched and the system uses a flexible band clip to secure the gutter. The lugs on the gutter are simply matched to the band clip and snapped into place. (See diagram 1)

An added benefit of the Notched Gutter system is the inclusion of grooves between the notches, which act as cutting markers. Wherever possible notched gutters should be cut at the mid-point of the notch as indicated by the mark. (See diagram 2)

#### Product benefits:

- Notches engage in band clip for a more secure joint
- No more dislodged guttering due to heat expansion
- Lightweight construction for easy handling, assembly and installation

# Cast Iron Effect Rainwater Soil & Vent System

Code: CLFT1

# Cast Iron Effect Rainwater Soil & Vent Systems

#### Product listing (See Product Guide for full details and pricing)

##### Ogee

- 130mm X 2m Ogee Gutter
- 130mm X 4m Ogee Gutter
- Ogee Gutter Union Bracket
- Ogee Gutter 90° External Angle
- Ogee Gutter 90° Internal Angle
- Ogee Gutter 135° External Angle
- Ogee Gutter 135° Internal Angle
- Ogee Gutter 150° External Angle
- Ogee Fabricated Gutter Angle
- Ogee Gutter Running Outlet
- Ogee Gutter Stop End External L/H
- Ogee Gutter Stop End External R/H
- Ogee Gutter Stop End Internal L/H
- Ogee Gutter Stop End Internal R/H
- Ogee Gutter Fascia Bracket
- Ogee Gutter Connector To Ogee Cast Iron L/H
- Ogee Gutter Connector To Ogee Cast Iron R/H
- Ogee Running Outlet Adaptor To Round Downpipe

##### Half Round

- Half Round Gutter 2m
- Half Round Gutter 4m
- Union Bracket
- Angle 90°
- Angle 135°
- Half Round Fabricated Gutter Angle
- Running Outlet
- Stop End Outlet
- Stop End External
- Stop End Internal
- Fascia Bracket

##### Downpipes

- 2.5m Downpipe
- 4m Downpipe
- 5.5m Downpipe
- Pipe Socket
- Pipe Clip
- Lugged Bracket
- Bend 90°
- Offset Bend 112°
- Shoe
- Branch 112°
- Decorative Hopper
- Offsets 75mm
- Offsets 150mm
- Offsets 305mm
- Fabricated Offset Bend - 0mm to 500mm

##### Soil & Vent

- 110mm X 3m Soil Pipe Single Socket
- 110mm Soil Double Socket
- 110mm Soil Pipe Bracket Socket
- 110mm X 92.5° Soil Bend Single Socket
- 110mm X 135° Soil Bend Single Socket
- 110mm X 92.5° Soil Bend Double Socket
- 110mm X 92.5° Equal Single Branch
- 110mm X 92.5° Soil Access Bend
- 110mm Soil Access Pipe Single Socket
- 110mm Soil Vent Terminal

## The new and improved Elegance range

Introducing our innovative Notched Gutter system and new Ogee profile

# For when you need a touch of *Elegance*...

The Polypipe Elegance range has been enhanced and extended with a new system profile, the addition of soil & vent products and the introduction of a revolutionary new notched gutter concept.

Together with the original core range, Elegance provides you with a comprehensive range of cast iron effect products all from a proven, reliable manufacturer and available alongside other Polypipe products from merchants nationwide.

The superior textured finish of the Polypipe Elegance system looks just like the traditional product. It's perfect for premium homes and houses in conservation areas.

## Ogee

New to the Elegance range

Providing style and tradition, the Polypipe Elegance cast iron effect rainwater system has been further extended with the addition of an Ogee profile.

Ogee most closely resembles the profile found on original cast iron installations. So when you want to preserve the traditional look of a period home, Elegance Ogee is the natural choice.

## Half Round

The original Elegance cast iron effect system

The Elegance half-round system has been at the core of the Polypipe cast iron effect range since its launch and has proven very popular with consumers looking to combine the flexibility and durability of plastic materials with the stylish, premium appearance of traditional cast iron systems.

## Downpipes

Designed for versatility

The Polypipe Elegance range is designed in such a way that each profile in the range utilises a common downpipe.

This ensures that merchant and installer stockholding can be kept to a minimum and that you will have the right pipes available, whichever system profile you are fitting. Elegance downpipes are supplied at 68.5mm diameter as standard and are available in 2.5m, 4.0m, and 5.5m lengths.

## Soil & Vent

Comprehensive product range

Completing the Elegance line up is a new range of soil & vent products in a matching cast iron effect finish.

Our soil & vent range is based on a 110mm soil pipe, supplied in 3.0m length, and a selection of sockets, bends and a vent terminal. The Polypipe Elegance soil & vent range uses our popular ring seal push-fit system, for quick and easy installation.
